

Hinges for **PVC**

*Since **1956**, thanks to our hinges, more than **1,000,000,000**
doors are opening **in 80 countries** all over the world.*

COMPANY

OTLAV S.p.A produces and sells hinges for doors and windows and other accessories for frames.

Founded in 1956 by entrepreneur Angelo Padovan, Otlav has produced **more than 2,2 billion of hinges**.

Thanks to almost 100 filed patents, Otlav ensures high quality standards and is present with its wide range of products in more than **80 countries worldwide**.

OTLAV new factory was inaugurated in 2007, in Via Angelo Padovan 2 in Santa Lucia di Piave (TV), in an area of 45,000 square meters, 19,500 of which are covered.

Following the opening of the first office in March 1956, OTLAV has nowadays found its perfect location to face the challenges of the new millennium. "OAMH" "Otlav Automatic Material Handling" is a project developed after five years of research and studies all around the world; a technological jewel created by designing at first the best logistical location, and then a subsequent lay out, and eventually the container to cover these structures: an unmistakable technological masterpiece, which is 20 meters high.

Rationalization of space, optimization of logistics and integrated use of automation: all of these account for respectively the flow or transportation of materials and the streaming of information. The goal is to cut costs by making the produced hinges increasingly competitive with an unparalleled level of quality.

OTLAV group companies

In 1990 Otlav creates Myrtus in Maniago (PN), Friuli. The company is specialized in galvanic treatments.

Founded 2002 in Romania is focused on some high-tech producing processes.

As required by European regulations and by Regulation (EU) No. 305/2011 all OTLAV hinges are subjected to stringent resistance tests to check performance both during the design phase and regularly during manufacturing. The I.U.S. (Intensive Use Simulator) is the testing system used in the OTLAV Test Laboratories.

EC Certificates and Performance Declarations

Tests on the hinges are also carried out at external bodies able to certify that the company manufactures according to rigid, systematically monitored production plans and that the products pass the tests envisaged by the standard UNI EN 1935/2004: they are thereby able to issue, if needed, the CE certificate or certify the data provided by OTLAV in the "performance declarations".

A WIDE RANGE OF COLOURS

The use of colours certainly characterizes and defines an object and it is often a fundamental element in the development of an architectural project. Exposure to one colour rather than another affects both formal and mental perception: it is for this reason that **OTLAV** values colour as a tool, because it can improve the quality and the liveability of current and future architectural projects.

- 
- The background of the image features a variety of OTLAV window hinge components, including different types of pins, bolts, and sleeves, some with decorative finishes. These are scattered over a large, circular color chart that displays a wide range of color swatches, each labeled with a name and a number. The color chart includes shades like 'Weißgrün', 'Kobaltblau', 'Rubinrot', 'Purpurrot', 'Lachs', 'Fleisch', 'Beige', 'Sandgelb', 'Grünbeige', and 'Graub beige'.

 - 9F** F9 Helium grey plastified
 - 9N** Matt black plastified, metal effect
 - 9P** Plastified RAL 9016, matt
 - 9T** Plastified RAL 7016

OTLAV has developed a wide and well defined range of coloured hinges for PVC windows and doors, available as standard products, for minimum quantities or on request for particular production requirements. This is a deliberate decision to keep pace with the needs of both construction companies and designers.

R3 ROLLACTA

Designed to fulfill modern design needs and high quality manufacturing standards, Rollacta is the ideal solution for uPVC doors.

The special **cylindrical shape** blends seamlessly with sash and frame **for elegant door** design solution and always leaves **the seal unscathed** ensuring high thermal and acoustic insulation values.
